Your chat prompts | October 2, 2026

All 10 user-written prompts, in chronological order, including the request for this PDF. Automatic IDE and app context and assistant replies are omitted. Wording is preserved.

PROMPT 01

Hey Chat, I have an assignment for my AI class to get you to build a simple orthogonal 3D game with some characters. I'd like for it to have cats. It needs to have character interaction of some kind with an NPC and interactions between the NPC's.

PROMPT 02

In the upper part of the game, the cats and items are going beneath the base level.

PROMPT 03

The picnic blanket looks like it's still slightly beneath the floor. Can you also create a game ending? Like a small thing that pops up once you sit down at the picnic blanket. If you've completed all the tasks, show a win, if not show a lose.

PROMPT 04

The fence in the top middle is in front of the tree when it should be behind.

PROMPT 05

Can we give the cat's a second eye and make the fish and catnip look more like fish and catnip?

PROMPT 06

Can you make the ball of yarn look more like yarn?

PROMPT 07

Can you create a small sidebar that let's you choose your cat's color?

PROMPT 08

Add a pop up if you select to sit down at the picnic asking if the user is sure they're ready so they don't accidentally click it and lose.

PROMPT 09

Can you randomize where the objects are and who asks for what?

PROMPT 10

Can you make me a PDF of all of the prompts I sent in this chat?
